Since the first day of business in 1996, the focus for Reliant Foodservice has been on helping our customers be more successful. Due to this commitment, Reliant has developed into one of the leaders in customized distribution for the foodservice industry. Personalized service, innovative and responsive approach has earned us the business and respect of some of the leading retailers in our market. With our continued growth, Reliant Foodservice has been recognized by INC. Magazine as one of the fastest growing private companies in the nation consecutively the past 6 years. (INC 5000 2012-2017)

Cake Pops

Chalet Desserts produces high quality bakery and confectionery products for the foodservice industry and is the largest manufacturer of Cake Pops in the world.

Cake pops have a moist, dough-like center that has a similar consistency to raw cookie dough, but **IT IS NOT RAW**. We take fully baked cake and crumble it into a bowl and then mix in icing, to create a soft, smooth dough that can be shaped into a ball. This is how a traditional cake pop is made.

What's so modern about Modern Oats?

We start by selecting only the most nutrient & protein rich, **non-genetically modified**, gluten-free certified, whole rolled oats. The highest grade from smaller, family run operations throughout the upper Midwest of North America.

After the groats are steamed and sized, we then blend with the finest, juiciest, **antioxidant rich superfruits**, omega 3 rich nuts and seeds, and lightly sweetened with only **organic** evaporated cane juice to craft the most delicious, healthy, modern blends of oatmeal found today.

what makes us different?

WHY GENEROSITY

pH Scale

(Measures how acidic or basic a substance is)

Optimal Hydration

Research shows that alkalized mineral water can increase hydration levels by 17% -maximizing your performance, fitness, and daily health.

Your body works best at a pH of 7.4, but in a world of high stress and caramel lattés, it's easy to get off balance. Drinking alkalized water helps neutralize acids and restore health

Packed with essential minerals like calcium and bicarbonate, research shows that alkalized water can improve bone density and help prevent osteoporosis.
