AMSTERDAM'S COOLEST ENERGY DRINK HAS ARRIVED!

Cannabis Energy Drink was developed for those who want to have a clear and focused mind and live an active and fun lifestyle. It can be consumed whenever you are in need of energy while working, driving or during sportive and leisure

activities. The functional benefits per can:

- It helps improve **CONCENTRATION**
- It helps increase **ALERTNESS**
- **Contributes to normal MENTAL PERFORMANCE** Contributes to the **REDUCTION OF FATIGUE**

The Cannabis Sativa plant grows without the need of it being treated with pesticides. The part of the plant that does not contain the element THC is the part from which the Hemp Seed Extract is being harvested. It contains important vitamins and minerals that are essential for a healthy life. Hemp oil contains 57% linoleic acid (LA) and 19% linoleic acid (LNA). That is exactly the ratio that doctors advice for a healthy diet. It helps the body fight problems such as obesities, diabetes, high cholesterol and high blood pressure. Linoleic acid (LA) and linoleic acid (LNA) are substances he body doesn't produce, but have to be obtained through food or drinks. One 250 ml (8.4 fl. Oz.) can of Cannabis Energy Drink contains 50mg of Hemp Seed Extract. Cannabis Energy Drink **does not** contain any THC or other psychoactive substances.

COLD BREW IS THE SUMMERTIME ANSWER!

Cold brew or cold press coffee refers to the process of steeping coffee grounds in room temperature or cold water for an extended period of time resulting in a coffee concentrate that must be diluted with water. It is also sometimes referred to as "Toddy" coffee which is a trademarked cold brewing system.

The cold press process requires grinding coffee beans at a relatively coarse setting (typically only as fine as necessary to allow filtering) and soaking those grounds for 24 hours. The water is normally kept at room temperature, but chilled water can also be used. The grounds must be filtered out of the water after they have been steeped using a paper coffee filter. The result is a coffee concentrate that is diluted with water and served over ice.

Because the coffee in cold press does not come into contact with heated water, the process of leaching flavor from the beans produces a different chemical profile than conventional brewing methods, providing a smoother and less acidic cup.

Groundwork's Certified Organic Cold Brew Coffee is sold in 2 formats: bottled, or poured by a barista in-store. Our bottled, ready-to-drink Cold Brew is sold in each Groundwork shop, as well as online at our website and by our retail partners. Groundwork Cold Brew concentrate is regularly delivered to our shops, fresh from the Roastery and ready to be prepared by a barista. Now available at Reliant.

Sambazon's Mission... Preserving the Amazon

We believe that what we do can change the world. As pioneers of nutrition, bringers of amazing taste, and believers of higher consciousness, we committed ourselves to preserving the Amazon rainforest. We believe in protecting and preserving the environment, in providing healthy and uncompromised nutrition to the world, and to believing in the power of positive change...little by little. And we want you to come along for the journey.

We Fell In Love When We Came To The Amazon in 1999.

We knew we had to protect it. But we wanted to do it in a way that lasts. We realized that if we could make a product from the Amazon economically beneficial, the Amazon itself would become a resource that businesses and governments would want to preserve. By hand-harvesting all our açai, this tiny, powerful berry grown in the heart of the most bio-dynamic ecosystem in the world, we're able to provide over 10,000 jobs to locals, preserve countless acres of rainforest, and spread the good vibes of this purple berry to the world.

We never compromise the core of who we are just to bring a product to market. We consider the livelihoods of the people that make us possible, the health of the plants we harvest, and the quality of the items we produce. We will always be organic, fair trade, and non-GMO.

JUNGLE LOVE ENERGY DRINK IS BACK! Yes, that great Passion Fruit taste is now available at Reliant once again. Your customers won't be able to get enough of this fresh jungle flavor. Order your case today and Chill It Down!! Item #20068.

Supplement-Boosts

BOOST YOUR PRODUCTS TO BOOST YOUR PROFITS!

Years ago, David and Ellie Gross owned and operated several yogurt and smoothie bars in the San Francisco area. In the interest of catering to the customers' appetite for healthy foods, they listed individual supplements on their menu board such as ginseng, taurine, guarana, etc. It was soon very apparent that customers had no idea what the benefits of each boost were.

After some thought, they decided to combine select ingredients together and call it an Energy boost. And that proved to be the start of a very popular eighteen-product supplement line.

Their idea was simple: a wide range of functional supplements; taste-free, easy to use, and of uniform scoop size. The name for each boost would describe the benefit. Like all healthy things, business began growing. People wanted healthy benefits added in. In fact, they had such great success with positioning their smoothie shops to the health and wellness market, that they sold their shops so they could focus completely

on helping other retailers reposition their stores to attract these customers. Reliant Foodservice has 14 Add A Scoop Supplements that can help boost your Products and Profits!

GENEROSITY WATER

More than selling water, we believe that people matter and everything we do is an expression of that fundamental value. We have produced a water that is high in alkalinity and at the same time helps people that do not have clean drinking water around the world!

THE WATER:

Our alkaline water is produced through a natural process that adds high quality and active minerals to the water ensuring a multi year shelf life while also maintaining the 10 pH balance. Research shows that alkalized mineral water can increase hydration levels by 17%-maximizing your performance, fitness, and daily health.

THE NEED:

There are currently 748 million people in the world that do not have access to clean drinking water, and each year this crisis kills more people than war, AIDS, and famine combined. Water is essential to every part of life—health, economic growth, access to education, and equality for women and children. That's why providing access to it is the first step to creating lasting change around the world.

One case of Generosity Water provides two people with clean water for a year.
